# Partnership Questions for Bank, SSC and Railway Exams – Partnership Quiz at Smartkeeda.

## Partnership Quiz 1

Directions: Kindly study the following Questions carefully and choose the right answer:

1. P starts business with Rs.4500 and after 9 months, Q joins with P as his partner. After a year, the profit divided in the 3 : 5. What is Q's contribution in the capital?

- A. Rs. 5,000                      B. Rs. 10,000                      C. Rs. 20,000  
D. Rs.30,000                      E. None of these

2. P and Q started a retail store with initial investments in the ratio 5 : 6 and their annual profits were in the ratio 2 : 3. If P invested the money for 8 months. For how many months did Q invest his money?

- A. 5                                      B. 6                                      C. 8  
D. 10                                      E. None of these

3. P and Q enter into partnership. P invests some money at beginning, Q invests double the amount after 4 months and R invests thrice the amount after 8 months. If the annual profit be Rs.32000, R's share is?

- A. Rs 12,000                      B. Rs 15,000                      C. Rs 32,000  
D. Rs 35,000                      E. None of these

4. P, Q, R hired Taxi for Rs. 680 and used it for 3, 5, 9 hours. respectively hire charges paid by Q are:

- A. Rs 100                              B. Rs 200                              C. Rs 300  
D. Rs 350                              E. None of these

5. P & Q entered in to partenership P investing Rs 8000 and Rs 6000 respectively. After 3 months P withdrew Rs 2000 while Q invested Rs 2000 more. After 3 more months, R joins the business with a capital of Rs 11000. The share of Q exceeds that of R. Out of the a total profit of Rs 35,100 after one year by.

- A. Rs 2300                              B. Rs 3600                              C. Rs 3800  
D. Rs 4200                              E. None of these

6. Vibhor started a retail business by investing Rs 50,000. After six months Keisham joined him with a capital of Rs 80,000. After 3 years. They earned a profit of Rs 24,500. What was the Vibhor's share in the profit?

- A. Rs 5500                              B. Rs 8500                              C. Rs 10500  
D. Rs 12650                              E. None of these

7. Alpana started a business investing Rs. 45,000. After 3 months Priyanka joined her with a capital of Rs. 60,000. After another 6 months Kalpana joined them with a capital of Rs. 90,000. At the end of the year, they made a profit of Rs. 16,500. Find the share of Kalpana.

- A. Rs. 2100                      B. Rs. 3300                      C. Rs. 3500  
D. Rs. 3800                      E. None of these

8. P, Q and R started a online education website by investing Rs.1,20,000, Rs.1,35,000 and Rs.1,50,000 respectively. Find the share of Q's, out of an annual profit of Rs.56,700.

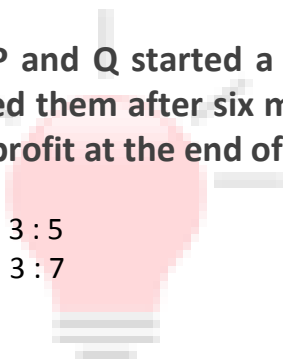

- A. Rs.12600                      B. Rs.15300                      C. Rs.17900  
D. Rs.18300                      E. None of these

9. P, Q and R start a business each investing Rs. 20,000 after 6 months P withdrew Rs.5000, Q withdrew Rs.4000 and R invests Rs.6000 more. At the end of the year, a total profit of Rs.39,780 was recorded. Find the share of P.

- A. Rs.10500                      B. Rs.11900                      C. Rs.20500  
D. Rs.23500                      E. None of these

10. P and Q started a partnership business investing some amount in the ratio of 2 : 3. R joined them after six months with an amount equal to that of Q. In what proportion should the profit at the end of the one year be distributed among P, Q and R?

- A. 2 : 3 : 5                      B. 1 : 3 : 5                      C. 4 : 6 : 3  
D. 2 : 3 : 7                      E. None of these

The Question Bank

**Correct Answers:**

<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>	<b>7</b>	<b>8</b>	<b>9</b>	<b>10</b>
D	D	E	B	B	C	B	E	B	C

**Explanations:****1.**

Let Q's Capital be Rs. x. Then =  $\frac{4500 \times 12}{3x}$

$$= \frac{4500 \times 12}{3x} = \frac{3}{5} \Rightarrow x = \frac{4500 \times 12 \times 5}{3 \times 3}$$

$$\Rightarrow 1500 \times 4 \times 5 \Rightarrow \text{Rs. } 30,000.$$

Hence, option D is correct.

**2.** Suppose P invested Rs. 5x for 8 months and Q invested 6x for y months then,

$$\frac{5x \times 8}{6x \times y} = \frac{2}{3} \Rightarrow y = \frac{40x \times 3}{6x \times 2}$$

$$y = \frac{120x}{12x} \Rightarrow y = 10.$$

Hence, option D is correct.

**3.** Let P's investment be Rs. x. then ratio of capitals =  $(x \times 12) : (2x \times 8) : (3x \times 4)$

$$\Rightarrow 12x : 16x : 12x \Rightarrow 3x : 4x : 3x$$

$$\therefore \text{R's share} = \text{Rs} \left[ 32000 \times \frac{3}{10} \right] \Rightarrow \text{Rs } 9600.$$

Hence, option E is correct.

**4.** P : Q : R = 3 : 5 : 9

Hire charges paid by Q

$$= \text{Rs} \left[ 680 \times \frac{5}{17} \right] \Rightarrow 40 \times 5 = \text{Rs } 200.$$

Hence, option B is correct.

**5.** P : Q : R =  $(8000 \times 3 + 6000 \times 9) : (6000 \times 3 + 8000 \times 9) : (11000 \times 6)$

$$\Rightarrow (24000 + 54000) : (18000 + 72000) : (66000)$$

$$\Rightarrow 78000 : 90000 : 66000$$

$$\Rightarrow 26 : 30 : 22$$

$$\Rightarrow 13 : 15 : 11$$

∴ Difference of Q's & R's shares

$$= \text{Rs}(35100 \times \frac{15}{39} - 35100 \times \frac{11}{39})$$

$$\Rightarrow \text{Rs.}(900 \times 15 - 900 \times 11) \Rightarrow 13500 - 9900 \Rightarrow \text{Rs } 3600.$$

Hence, option B is correct.

**6.** Vibhor : Keisham =  $(50000 \times 36) : (80000 \times 30) \Rightarrow 3 : 4$

∴ Vibhor's share =  $\text{Rs}[24500 \times \frac{3}{7}] \Rightarrow \text{Rs.}10500.$

Hence, option C is correct.

**7.** Clearly, Alpana invested her capital for 12 months, Priyanka for 9 months and Kalpana for 3 months.

So, ratio of their capitals =  $(45000 \times 12) : (60000 \times 9) : (90000 \times 3)$

$$\Rightarrow 540000 : 540000 : 270000$$

$$\Rightarrow 2 : 2 : 1.$$

∴ Kalpana's share =  $\text{Rs}[16500 \times \frac{1}{5}] = \text{Rs.}3300.$

Hence, option B is correct.

**8.** Ratio of shares of P, Q and R = Ratio of their investments =  $120000 : 135000 : 150000$

$$\Rightarrow 8 : 9 : 10.$$

∴ Q's share =  $\text{Rs.}(56700 \times \frac{9}{27}) \Rightarrow \text{Rs.}18900.$

Hence, option E is correct.

**9.** Ratio of the capitals of P, Q and R =  $20000 \times 6 + 15000 \times 6 : 20000 \times 6 + 16000 \times 6 : 20000 \times 6 + 26000 \times 6$

$$\Rightarrow 210000 : 216000 : 276000 = 35 : 36 : 46$$

∴ P's share =  $\text{Rs.}(39780 \times \frac{35}{117}) \Rightarrow \text{Rs. } 11900$

Hence, option B is correct.

**10.** Let the Initial investments of P and Q be  $2x$  and  $3x$ .

$$P : Q : R = (2 \times 12) : (3 \times 12) : (3 \times 6)$$

$$\Rightarrow 8 : 12 : 6$$

$$\Rightarrow 4 : 6 : 3.$$

Hence, option C is correct.
