# Alphabet questions exercise for IBPS PO pre, IBPS clerk, SBI PO pre and SBI Clerk exams

## ALPHABET TEST QUIZ 7

Directions: Read the following questions carefully and choose the right answer.

1. Each consonant of the word 'TERMINATION' is changed to the previous letter in the English alphabetical series and each vowel is changed to the next letter in the English alphabetical series. If the new alphabets thus formed are arranged in alphabetical order (from left to right), which of the following will be the sixth letter from the right end?

- A. M                                      B. S                                      C. P  
D. L                                      E. None of these

2. If in the word SEPTUAGENARIAN first three and then next three letters are written in reverse order and the rest of the letters are written as they appear in English alphabet, the positions of how many letters get changed in the new arrangement?

- A. Nil                                      B. 2                                      C. 10  
D. 12                                      E. None of these

3. If all the letters of the word INTROSPECTION are arranged in a way that all the vowels are arranged in the beginning in alphabetical order and then all the consonants are arranged in the alphabetical order, then position of how many letters remains unchanged?

7. If in the word 'CAPITALIZATION' all the letters are arranged in alphabetic order then how many vowels are replaced by a new vowel?

- A. None                      B. One                      C. Two  
D. Three                      E. More than three

8. If the letter of the words 'FUTURISTIC' are arranged in alphabetic order from left to right then what would be the third letter of the meaningful English word formed using third, fifth, sixth and eighth letter of the word formed after arranging? (If no word is formed mark 'L' as your answer and if more than one word are formed mark 'M' as your answer)

- A. R                      B. I                      C. S  
D. L                      E. M

9. How many such pair(s) of letters are there in the word 'ELOQUENT' which has as many letters between them as in the alphabetical series?

- A. None                      B. One                      C. Two  
D. Three                      E. More than three

10. If all the letters of the word 'UNIDENTIFIED' are arranged in the alphabetical order then the position of how many letters will be remain unchanged?

- A. None                      B. One                      C. Two  
D. Three                      E. More than three

**Correct answers:**

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

A	D	B	B	C	A	C	B	C	B
---	---	---	---	---	---	---	---	---	---

**Explanations:**

**1.**

**The given word:**

T E R M I N A T I O N

Applying the above condition, we have new word:

S F Q L J M B S J P M

Now, arranging in alphabetical order (from left to right)

B F J J L M M P Q S S

Hence, M is sixth from the right.

Hence, the correct answer is option A.

**2.**

S	E	P	T	U	A	G	E	N	A	R	I	A	N
P	E	S	A	U	T	A	A	E	G	I	N	N	R

Clearly, except E and U the positions of all other letters (12) get changed in the new arrangement.

Option D is hence the correct answer.

**3.**

Given word and the new word after the given rearrangement:

I	N	T	R	O	S	P	E	C	T	I	O	N
E	I	I	O	O	C	N	N	P	R	S	T	T

Thus position of only one letter i.e, "O" remains unchanged.

Hence option B is correct.

**4.**

Given word and the new word after the given rearrangement:

D	O	O	R	S	T	E	P
C	P	P	Q	R	S	F	O

Thus 'O' is the only vowel in the new arrangement.

Hence option B is correct.

**5.**

<b>Old word</b>	F	R	A	G	M	E	N	T
<b>New word</b>	E	Q	B	F	L	F	M	S

Apparently, four letters viz. E, F, F and M of the new word are similar to the letters of the old word.

Hence option C is the correct answer.

**6.**

We have,

The given word = FAVOURITE

After arranging all the consonants on the left in reversed alphabetical order, we get:

VTRF

Now, arranging all the vowels on the right of these consonants, we get:

VTRFAEIOU

Here, the third letter from right end is **I** and fourth letter from left end **F**.

And, we know that there are two letters between **F** and **I** in alphabetical series.

Hence, the correct answer is option **A**.

**7.**

We have,

The given word = CAPITALIZATION

After arranging the letters in alphabetic order the word becomes =  
AAACIIILNOPTTZ

<b>Before</b>	C	A	P	I	T	A	L	I	Z	A	T	I	O	N
<b>After</b>	A	A	A	C	I	I	I	L	N	O	P	T	T	Z

Here, there are two such vowels which are replaced by a new vowel.

Hence, the correct answer is option **C**.

8.

We have, the given word = FUTURISTIC

After arranging the letters of the word in alphabetic order from left to right we get = CFIIRSTTUU

Now, the third, fifth, sixth and eighth letter of the word 'CFIIRSTTUU' are I, R, S and T.

The meaningful English word that can be formed using I, R, S and T is STIR.

STIR – move a spoon or other implement round and round in (a liquid or other substance) in order to mix it thoroughly.

Here, the third letter of the word 'STIR' is 'I'.

Hence, the correct answer is option B.

9.

We have,

E	L	O	Q	U	E	N	T
---	---	---	---	---	---	---	---

Possible pair of letters in the above word which has as many letters between them as in the English alphabetical series:

Pair 1:

Letters in the word	O	Q	U	E	N	T
Letters in the alphabetical series	O	P	Q	R	S	T

Pair 2:

Letters in the word	Q	U	E	N
Letters in the alphabetical	Q	P	O	N

series				
--------	--	--	--	--

Here, we can observe that there are two such possible pairs of letters satisfy the above conditions.

Hence, the correct answer is option C.

10.

The given word is:

UNIDENTIFIED

After arranging the letters in alphabetical order:

DDEEFIINNTU

U	N	I	D	E	N	T	I	F	I	E	D
D	D	E	E	F	I	I	I	N	N	T	U

Smartkeeda  
The Question Bank

On comparing both the words we will find that the position of only 1 letter viz. I is unchanged.

Hence, the correct answer is option B.
