Correct Answers:

1	2	3	4	5	6	7	8	9	10
D	C	B	A	C	D	D	B	C	A

Explanations:

1.

All other numbers consist of odd digits only.
Hence, option D is correct.

2.

Each of the numbers except 345, is one more than the cube of a certain number.
Hence, option C is correct.

3.

In all other numbers, the last digit is the sum of the first two.
Hence, option B is correct.

4.

In all other numbers, the sum of the first and the last digits is equal to the sum of other two digits.
Hence, option A is correct.

5.

Each of the given numbers is a prime number. But the number obtained on reversing the digits of each of the numbers except 23, is also a prime number.
Hence, option C is correct.

6.

In all other numbers, the middle digit is equal to the product of other two digits.
Hence, option D is correct.

7.

This is the only number in which a digit has been repeated.
Hence, option D is correct.

8.

In all other numbers, the first and the last digits are the same.
Hence, option B is correct.

9.

131 is the only prime number in the group.
Hence, option C is correct.

10.

In all other numbers, the last digit is one more than the first digit.
Hence, option A is correct.
