C	C	D	A	E

Common Explanation :

The given words are coded as per the following pattern:

1. The digit in the code represents the number of letters in the word.
For example: In word "DIGIT", there are 5 letters, so the code will begin with 5.

2. The symbol in the code is based upon the following table.

No. of letters in the word	Symbol
2	^
3	%
4	@
5	#
6	$
7	&
8	*
9	=

For example: In word "DIGIT" the number of letters are 5, so the middle code would be #.

3. The letter in the code represents the first vowel from left end in the given word.
For example: In word "DIGIT" the first vowel from left end is I, so the code will end with I.
Hence the code for "DIGIT" is "5#I".
