## Answers :

1. Clearly, the word for the code 'sa' is 'in'.

Option C is hence the correct answer.

2. In the given phrase only the word 'with' is there the coding of which is not mentioned in any of the given codes. Now, in all the options except option B, the given codes are present in the question summary and hence all other options can be eliminated. But the code of 'ma' is not know and that's why we can take option B as a valid answer.

Option B is hence the correct answer.

3. From common explanation we can deduce that the coding for 'read paper' will be 'pa la'.

Hence, Option A is correct.

4. Following common explanation we can infer that the code 'sa na ta' will be used for the phrase 'pen and in'.

Hence, Option C is correct.

5. Following common explanation, it is evident that the code for the word 'And' will be 'na'.

Hence, Option B is correct.
