5. What is the code for the word 'Think'?

A. 3D& B. 4L# C. 3Z$ D. 2Y% E. Can't be determined

Correct Answers:

1	2	3	4	5
C	C	B	C	B

Common explanations :

In this question,

1. Each of the symbols of mathematical operations in the end of the code represents the number of letters its corresponding word does have.

No. of letters in the word	Symbol
3	%
4	$
5	#
6	@
7	&

2. Now, the letters used in the middle of the codes represent two methods. Some words end with a consonant and the other end with a vowel. A consonant representing the word it belongs to, gets coded as the next letter in the alphabet and a vowel representing the word it belongs to, gets coded as the previous letter of this vowel in the alphabet.

For example,

The word 'Worker' ends with 'R' and the next letter to 'R' in the alphabet is 'S'. So, the code of 'Worker' made applying the rules discussed so far would be " _S@.

3. The number in each of the codes represents the number of consonants present in each of the words.

For instance,

The number of consonants in the word 'Worker' is 4. Hence, the complete code for 'Worker' will be 4S@.

Following the rules discussed so far, we can code the other words as well.
