DI Bar Chart Quiz 52

Directions : Study the following bar chart carefully and answer the questions given beside.

GOGOAGONE PVT. LTD, is a travel service company which plans for a trip for its customers. The Bar Chart 1 given below gives the information about the percentage of customers out of total customers who went to Goa in every month from Jan to June in the year 2018. The Bar Chart 2 given below gives the information about the number of customers who didn't go to Goa in each of the 6 months.

Total number of customers of the respective months = The ones who went to Goa + The ones who didn't go to Goa

1. The total number of customers in June was how many more than that of Jan?

- A. 1100 B. 1300 C. 900 D. 750 E. None of these

2. In April, the ratio of males to female customers was 3 : 2. If 40% of the total number of male customers went to Goa, then among the customers who didn't go to Goa how many of them were females?

- A. 225 B. 348 C. 216 D. 228 E. None of these

3. The number of customers who went to Goa in Jan and Feb together was how many less than the number of customers who didn't go to Goa in March and April together?

- A. 853 B. 933 C. 756 D. 923 E. None of these

4. In the first three months of the year 2018, the total number of female customers was 800, then what was the total number of male customers in these months together?

- A. 3430 B. 3840 C. 2960 D. 3660 E. 3420

5. How many customers of GOGOAGONE Pvt Ltd had gone to Goa in the first six months of the year 2018?

- A. 4652 B. 4482 C. 4812 D. 4962 E. None of these

Correct Answers:

1	2	3	4	5
A	D	B	D	C

Common Explanation:

Months	Jan	Feb	March	April	May	June
Who didn't go to Goa	680	696	805	912	665	840
Who went to Goa	32%	40%	65%	52%	30%	60%
Total	$(100 - 32)\% = 68\% = 680$ $100\% = 680$ $\times 100/68 = 1000$	$(100 - 40)\% = 60\% = 696$ $100\% = 696$ $\times 100/60 = 1160$	$35\% = 805$ $100\% = 2300$	$48\% = 912$ $100\% = 1900$	$70\% = 665$ $100\% = 950$	$40\% = 840$ $100\% = 2100$
The number of customers who went to Goa	32% of 1000 = 320	40% of 1160 = 464	65% of 2300 = 1495	52% of 1900 = 988	30% of 950 = 285	60% of 2100 = 1260

Answers :

1. The total number of customers in June = 2100

The total number of customers in Jan = 1000

The required difference = $2100 - 1000 = 1100$

Hence, option A is correct.

2. In April, the total number of customers = 1900

The total number of males = $\frac{1900 \times 3}{5} = 1140$

The total number of females = $\frac{1900 \times 2}{5} = 760$

The total number of males who went to Goa = 40% of 1140 = 456

The total number of males who didn't go to Goa = $1140 - 456 = 684$

Among the customers who didn't go to Goa, the number of females = $912 - 684 = 228$

Hence, option D is correct.

3. The number of customers who went to Goa in Jan and Feb together = 784

The number of customers who didn't go to Goa in March and April together = 1717

The required difference = $1717 - 784 = 933$

Hence, option B is correct.

4. The total number of customers in the first 3 months = $1000 + 1160 + 2300 = 4460$

The total number of male customers in these months together = $4460 - 800 = 3660$

Hence, option D is correct.

5. The total number of customers of GOGOAGONE Pvt Ltd who had gone to Goa in the first six months of the year 2018 = $320 + 464 + 1495 + 988 + 285 + 1260 = 4812$

Hence, option C is correct.
