DI Bar Chart Questions for SBI Clerk Pre, IBPS Clerk Pre, LIC Assistant Pre and IBPS RRB Assistant Pre Exams.

DI Bar Chart No.68

Directions: Study the following bar chart carefully and answer the questions given beside.

The following graph shows the performance of students of 6 schools in a board exam.

Number of students passed = number of students passed with distinction + number of students passed without distinction

1. In how many schools is the pass percentage at least 80?

- A. 2 B. 3 C. 4 D. 1 E. None of these

2. In which of the following schools, the ratio of the number of students passing with distinction to those failing is least?

- A. Modern B. Greenwood C. Sainik D. Treamis E. D.A.V.

3. In which of the following schools, the percentage of students passing without distinction is least?

- A. Modern B. Greenwood C. Sainik D. Treamis E. D.A.V.

4. Considering all the six schools, what percent of the students have passed with distinction?

- A. 33.11% B. 32.21% C. 34.22% D. 35.63% E. 37.54%

5. What is the ratio of the total number of students who failed to those who passed, in all the six schools together?

- A. 43 : 121 B. 21 : 37 C. 43 : 111 D. 21 : 38 E. None of these

Correct Answers:

1	2	3	4	5
B	C	C	A	C

The Question Bank

Explanations :

1. In Sainik, Modern and Greenwood the pass percentage is less than 80%.

In Treamis, $1250 > (80\% \text{ of } 1300)$ and in D.A.V. $1250 > (80\% \text{ of } 1500)$.

And also in Loreto it is $800 = 80\%$

In Loreto, Treamis and D.A.V. the pass percentage is at least 80%.

Hence, option B is correct.

2. The ratio for different schools is as follows:

$$\text{Modern} = \frac{400}{650} = \frac{8}{13}$$

$$\text{Greenwood} = \frac{400}{500} = \frac{4}{5}$$

$$\text{Sainik} = \frac{300}{500} = \frac{3}{5}$$

$$\text{Treamis} = \frac{600}{50} > 1$$

$$\text{D.A.V.} = \frac{500}{250} > 1$$

$\frac{3}{5}$ is the least.

Hence, option C is correct.

3. The values for different schools are:

$$\text{Sainik} = \frac{200 \times 100}{1000} = 20\%$$

$$\text{Modern} = \frac{350 \times 100}{1400} = 25\%$$

$$\text{Greenwood} = \frac{600 \times 100}{1500} = 40\%$$

$$\text{Treamis} = \frac{650 \times 100}{1300} = 50\%$$

$$\text{D.A.V.} = \frac{750 \times 100}{1500} = 50\%$$

Hence, option C is correct.

4. The overall pass percentage with distinction

$$= \frac{300 + 400 + 400 + 350 + 600 + 500}{1000 + 1400 + 1500 + 1000 + 1300 + 1500} \times 100$$

$$= 33.1\%$$

Hence, option A is correct.

5. The total number of students who passed = $(500 + 750 + 1000 + 800 + 1250 + 1250) = 5550$

Total number of students = $(1000 + 1400 + 1500 + 1000 + 1300 + 1500) = 7700$

Therefore, The total number of students who failed = $(7700 - 5550) = 2150$

$$\text{Reqd. ratio} = \frac{2150}{5550} = \frac{43}{111}$$

Hence, option C is correct.
