## DI Line Chart Quiz 15

Direction : Study the following line graph carefully to answer the questions that follow.

Units of Raw Material Manufactured and Sold by a Company over the Years (units in crore)

1. Find the difference between the average number of units sold and manufactured over the years?

- A. 1000000      B. 100000000      C. 12000000      D. 10000000      E. None of these

2. What is the respective ratio of units sold and manufactured in 2007 & 2009 together to 2008 and 2011 together?

- A. 2.3 : 3.1      B. 1 : 2      C. 3.7 : 5.1      D. 2.1 : 4.1      E. None of these

3. The total number of units sold and manufactured in year 2008 & 2010 together is what per cent to the remaining years' manufactured and sold units?

- A. 46.77%      B. 59.54%      C. 56.67%      D. 64.44%      E. None of these

4. What is the per cent increase in the number of units sold in the year 2011 from the previous year?

- A. 10%                      B. 20%                      C. 5%                      D. 15%                      E. None of these

5. By how much per cent is the sold unit of 2011 more than the manufactured units of 2008?

- A. 50%                      B. 25%                      C. 75%                      D. 100%                      E. None of these

**Correct Answers:**

<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>
D	E	C	B	A

**Explanations:**

**1.**

$$\text{Avg. of units sold over the years} = \frac{(4.5 + 5 + 5.5 + 5 + 6)}{5} \times 10000000$$

$$= \frac{26}{5} \times 10000000 = 52000000$$

$$\text{Avg. of units manufactured over the years} = \frac{(3.5 + 4 + 5 + 3 + 5.5)}{5} \times 10000000$$

$$= \frac{21}{5} \times 10000000 = 42000000$$

Reqd. difference = 52000000 – 42000000 = 10000000.

Hence, option D is correct.

**2.** Units sold and manufactured in year 2007 =  $3.5 + 4.5 = 8$  crore  
And in year 2009 =  $5 + 5.5 = 10.5$  crore  
Sum of the units of both years 2007 and 2009 =  $8 + 10.5 = 18.5$  crore  
Similarly,  
Units sold and manufactured in year 2008 =  $4 + 5 = 9$  crore  
And in year 2011 =  $5.5 + 6 = 11.5$  crore  
Sum of the units of both years 2008 and 2011 =  $9 + 11.5 = 20.5$  crore  
Reqd. ratio =  $18.5 : 20.5 = 3.7 : 4.1$   
Hence, option E is correct.

**3.** Total number of units sold and manufactured in year 2008 & 2010 together =  $(5 + 4) + (5 + 3) = 17$   
Remaining years are: 2007, 2009 & 2011  
Total of remaining years' units =  $(3.5 + 4.5) + (5 + 5.5) + (5.5 + 6) = 8 + 10.5 + 11.5 = 30$   
Reqd. % =  $\frac{17}{30} \times 100 = 56.67\%$   
Hence, option C is correct.

**4.** Total number of units sold in previous year (2010) = 5 crore  
Total number of units sold in 2011 = 6 crore

$$\text{Reqd. \%} = \frac{6 - 5}{5} \times 100$$

$$= \frac{1}{5} \times 100 = 20\%$$

Hence, option B is correct.

**5.** Total number of units manufactured in 2008 = 4 crore  
Total number of units sold in 2011 = 6 crore

$$\text{Required \%} = \frac{6 - 4}{4} = \frac{2}{4} \times 100 = 50\%$$

Hence, option A is correct.
