DI Line Chart Questions for SBI Clerk Pre, IBPS Clerk Pre, LIC Assistant Pre and IBPS RRB Assistant Pre Exams.

DI Line Chart No 42

Directions : Study the following line chart carefully and answer the questions given beside.

The following line graph represents the expenditure (in Rs.) and profit (in Rs.) of a company from 2015-16 to 2020-21.

1. During which year is the income of the company the highest?

- A. 2015 – 16 B. 2016 – 17 C. 2017 – 18 D. 2020 – 21 E. 2018 – 19

2. During which of the following years is the percentage increase in the income of the company over the previous year the highest?

- A. 2020 – 21 B. 2018 – 19 C. 2016 – 17 D. 2019 – 20 E. 2017 – 18

3. During which of the following years is the ratio between the expenditure and the profit the same?

- A. 2015-16 and 2019-20 B. 2016-17 and 2020-21 C. 2018-19 and 2020-21
D. 2019-20 and 2020-21 E. None of these

4. During which year is the income of the company the lowest?

- A. 2020 – 21 B. 2018 – 19 C. 2015 – 16 D. 2019 – 20 E. 2017 – 18

5. The income of the company in 2016-17 is what percent of the difference between the expenditure of the company in 2018-19 and 2015-16?

- A. 150% B. 100% C. 250% D. 300% E. None of these

Correct Answers:

1	2	3	4	5
D	A	D	C	E

Explanations :

1. Income = Expenditure + Profit for different years, income is as follows.

$$2015 - 16 = 20 + 5 = 25$$

$$2016 - 17 = 30 + 10 = 40$$

$$2017 - 18 = 40 - 10 = 30$$

$$2018 - 19 = 40 + 0 = 40$$

$$2019 - 20 = 20 + 10 = 30$$

$$2020 - 21 = 40 + 20 = 60$$

Income in 2020 – 21 is highest.

Hence, option D is correct.

2. The percentage increase in the income is highest in 2020 – 21 over its previous year, since here only income is doubled, whereas for others it is not doubled.

Hence, option A is correct.

3. Considering the given choices, ratio of expenditure to profit is as follows:

$$2015-16, 2019-20 \rightarrow 20 : 5 = 4 : 1 \text{ and } 20 : 10 = 2 : 1$$

$$2016-17, 2020-21 \rightarrow 30 : 10 = 3 : 1 \text{ and } 40 : 10 = 4 : 1$$

2018-19, 2020-21 \rightarrow for 2018-19 ratio cannot be determined, as profit is nil.

$$2019-20, 2020-21 \rightarrow 20 : 10 = 2 : 1 \text{ and } 40 : 20 = 2 : 1$$

In 2019-20 and 2020-21, ratio of expenditure to profit is same.

Hence, option D is correct.

4. Income = Expenditure + Profit for different years, income is as follows.

$$2015 - 16 = 20 + 5 = 25$$

$$2016 - 17 = 30 + 10 = 40$$

$$2017 - 18 = 40 - 10 = 30$$

$$2018 - 19 = 40 + 0 = 40$$

$$2019 - 20 = 20 + 10 = 30$$

$$2020 - 21 = 40 + 20 = 60$$

Income in 2015 – 16 is lowest.

Hence, option C is correct.

5. Income of the company in 2016-17 = $(30 + 10) = 40$

Difference between the expenditure of the company in 2018-19 and 2015-16 = $(40 - 20) = 20$

$$\text{Reqd. \%} = \frac{40}{20} \times 100 = 200\%$$

Hence correct option is E.
