Date Interpretation Pie Chart Questions for Bank PO Exams.

DI Pie Chart Quiz 17

Directions: Study the following graph carefully & answer the questions given below it.

1st Pie Chart shows: % of Professor and Assistant Professor together teaching six different subjects in University 'X'

2nd Pie Chart shows: % of Professor teaching six different subjects in University 'X'

Chart I

Total number = 150

Chart II

Total number = 50

1. If the ratio of the total number of male Professors to the total number of female Professors is 9 : 16 and the ratio of the total number of male Assistant Professors to the total number of female Assistant Professors is 9 : 11, what is the total number of female Professors and Assistant Professor teaching the given six subjects in University 'X'?

- A. 63 B. 90 C. 77 D. 73 E. 87

2. What is the central angle corresponding to the total number of Professors and Assistant Professors teaching Hindi?

- A. 46.8° B. 50.4° C. 43.2° D. 39.6° E. 45.2°

3. What percent Professors are teaching Psychology and Sociology together out of the total number Professors and Assistant Professors teaching these two subjects together?

- A. $29\frac{1}{6}\%$ B. $24\frac{1}{4}\%$ C. $25\frac{5}{6}\%$ D. $21\frac{3}{4}\%$ E. $22\frac{1}{6}\%$

4. The total number of Assistant Professors teaching Economics and English together is what percent more than the total number of Professors teaching these two subjects together?

- A. 138% B. 145% C. 130% D. 142% E. 140%

5. What is the average number of Professors teaching Computer science, Psychology, English and Sociology?

- A. 9 B. 8 C. 10 D. 11 E. 17

Correct Answers:

1	2	3	4	5
E	C	A	E	A

Explanations:

1. Total no. of Assistant Professors = $150 - 50 = 100$

$$\text{Now, female Professors} = 50 \times \frac{16}{25} = 32$$

$$\text{Female Assistant Professors} = \frac{11}{20} \times 100 = 55$$

Total no. of female Professors and Assistant Professors = $32 + 55 = 87$

Hence, option E is correct

2.

$$\text{Reqd. central angle} = \frac{12 \times 360}{100} = 12 \times 3.6 = 43.2^\circ$$

Hence, option C is correct.

3. Total no. of Professors and Assistant Professor teaching Psychology and Sociology together = $(18 + 14)\% = 32\%$ of 150

$$\text{Now, } 32\% \text{ of } 150 = \frac{32 \times 150}{100} = 48$$

Total no. of Professors teaching Psychology and Sociology together = $(16 + 12)\% = 28\%$ of 50 = 14.

$$\text{Reqd. } \% = \frac{14}{48} \times 100 = \frac{7 \times 25}{6} = \frac{175}{6} = 29\frac{1}{6}\%$$

Hence, option A is correct.

4. Total no. of Professor teaching Economics and English together = $(20 + 10)\% = 30\%$ of 50 = $\frac{30 \times 50}{100} = 15$

Total no. of Assistant Professors teaching Economics and English together = $(24 + 10) = 34\%$ of 150 = 15

$$= \frac{34 \times 150}{100} - 15 = 51 - 15 = 36$$

$$\text{Reqd. } \% \text{ more} = \frac{36 - 15}{15} \times 100 = \frac{21}{15} \times 100 = 140\% \text{ more}$$

Hence, option E is correct.

5.

$$\text{Reqd. average} = \frac{(24 + 12 + 20 + 16)\% \text{ of } 50}{4}$$

$$= \frac{72\% \text{ of } 50}{4} = \frac{72 \times 50}{100 \times 4} = 9$$

Hence, option A is correct.
