## Date Interpretation Pie Chart Questions for Bank PO Exams.

### DI Pie Chart Quiz 26

Directions: Study the following graph carefully & answer the questions given below it.

Collection distribution of Bahubali 1 out of total collection of 250 crore

Collection distribution of Bahubali 2 out of total collection of 500 crore

**1. If the earnings of Video Game Rights of Bahubali 1 increase by 8% and the earnings of Music Rights decrease by 10%, how much more/less money would Bahubali 1 earn than Bahubali 2 in the mentioned segments?**

- A. 34.5 crore more    B. 34.5 crore less    C. 32.5 crore more    D. 32.5 crore less    E. None of these

**2. How much more/less money was earned through TV Rights and DVD Rights taken together by Bahubali 2 than Bahubali 1?**

- A. 5 crore more    B. 5 crore less    C. 8 crore more    D. 8 crore less    E. None of these

**3. Find the variation between the percentage increase in the Ticket Sale and percentage increase in the sale done through Video Game rights from Bahubali 1 to Bahubali 2.**

- A. 25%    B. 45%    C. 50%    D. 100%    E. None of these

**4. What is the percentage increase in the angle subtended at the centre by Sponsorship in Bahubali 2 over that in Bahubali 1?**

- A. 66.66%    B. 50%    C. 33.33%    D. 25%    E. None of these

**5. If the overall collection of Bahubali 2 increases by 50% due to phenomenal increase in ticket sale and sponsorship happening overseas, by how much percent the other angular collection distribution of other categories will decrease?**

- A. 25%    B. 33.33%    C. 66.66%    D. 100%    E. None of these

**Correct Answers:**

<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>
B	A	D	C	B

## Explanations:

### 1. From Bahubali 1:

The money earned through Video Game Rights = 5% of 250 crore = 12.5 crore

∴ Earnings after 8% increase = 108% of 12.5 crore = 13.5 crore

The money earned through Music Rights = 12% of 250 crore = 30 crore

∴ Earning after 10% decrease = 90% of 30 = 27 crore

Now, the total money earned through Video Games Rights and Music Rights = 13.5 + 27 = 40.5 crore

### From Bahubali 2:

The money earned through Video Games Rights = 36°

∴ Total money earned through Video Games Rights

$$= \frac{36}{360} \text{ of } 500 \text{ crore} = 50 \text{ crore}$$

And, the money earned through Music Rights = 18°

∴ Total earning through Music Rights

$$= \frac{18}{360} \text{ of } 500 \text{ crore} = 25 \text{ crore}$$

Now, the total money earned through Video Games Rights and Music Rights = 50 + 25 = 75 crore

∴ Reqd. difference = 75 – 40.5 = 34.5 crore

Hence, option B is correct.

### 2. From Bahubali 2:

The money earned through TV Rights = 54° of 500 crore

$$= \frac{54}{360} \times 500 \text{ crore} = 75 \text{ crore}$$

The money earned through DVD Rights = 18° of 500 crore

$$= \frac{18}{360} \times 500 \text{ crore} = 25 \text{ crore}$$

The total money earned through TV Rights and DVD Rights = 75 + 25 = 100 crore

### From Bahubali 1:

The money earned through TV Rights = 20% of 250 crore = 50 crore

The money earned through DVD Rights = 18% of 250 crore = 45 crore

The total money earned through TV Rights and DVD Rights = 50 + 45 = 95 crore

∴ Reqd. difference = 100 – 95 crore = 5 crore more by Bahubali 2.

Hence, option A is correct.

**3.**

$$\text{Total Ticket sale of Bahubali 1} = \frac{250 \times 20}{100} = 50 \text{ crore}$$

$$\text{Total Ticket sale of Bahubali 2} = \frac{500 \times 108}{360} = 150 \text{ crore}$$

∴ Percentage increase in the amount of Ticket Sale

$$\Rightarrow \frac{(150 - 50)}{50} \times 100 = 200\%$$

The money earned through Video Game Rights by Bahubali 1 = 5% of 250 crore = 12.5 crore

The money earned through Video Game Rights by Bahubali 2 = 36° of 500

$$= \frac{36}{360} \times 500 = 50 \text{ crore}$$

∴ Percentage increase in the amount of Video Game Rights

$$\Rightarrow \frac{(50 - 12.5)}{12.5} \times 100 = 300\%$$

The required percentage variation ( $\Delta$ ) = 300% – 200% = 100%

Hence option D is correct.

**4.**

$$\text{Sponsorship in Bahubali 1} = \frac{360 \times 15}{100} = 54^\circ$$

$$\text{Sponsorship in Bahubali 2} = 72^\circ$$

$$\therefore \text{Percentage increase in the angle subtended by Sponsorship} = \frac{18}{54} \times 100 = 33.33\%$$

Hence, option C is correct.

**5.** Total earning of Bahubali 2 = 500 cr

Increased collection = 150% of 500 = 750 cr

Distribution of Ticket sale and Sponsorship = (108 + 72) degrees of 500 = 50% of 500 = 250 cr

Increased distribution of Ticket sale and Sponsorship = 250 + 250 = 500 cr

Therefore, angular distribution of Ticket sale and Sponsorship

$$= \frac{500}{750} \times 360 = 240^\circ$$

Therefore, angular distribution of the other categories = 360 – 240 = 120 degrees

And as earlier angular distribution of the other categories = 180 degrees

Percentage reduction in angular distribution of other categories

$$= \frac{180 - 120}{180} \times 100 = 33.33\%$$

Clearly, option B is the correct answer.
