## Date Interpretation Pie Chart Questions for Bank and SSC Exams.

### DI Pie Chart Quiz 4

Directions: Study the following graph carefully & answer the questions given below it.

The pie chart, given here shows the amount of money spent (in degrees) on various sports by a school administration in a particular year.

1. If the money spent on football was Rs. 9000, how much more money was spent on hockey than football?

- A. 11000      B. 11500      C. 12000      D. 12500      E. None of these

2. If the money spent on football was Rs. 9000, what amount was spent on cricket?

- A. 31000      B. 31500      C. 32000      D. 32500      E. None of these

3. If the money spent on football is Rs. 9000, what was the total amount spent on all sports?

- A. 73000      B. 72800      C. 72500      D. 72000      E. None of these

4. If Rs. 9000 were spent on football then the money spent on Tennis is what % of money spent on Basketball?

- A. 175%      B. 250%      C. 275%      D. 300%      E. None of these

5. If total money spent on all sports is Rs. 5040 then what is the difference between the money spent on Hockey and Football.

- A. Rs. 450      B. Rs. 550      C. Rs. 770      D. Rs. 850      E. None of these

**Correct Answers:**

<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>
A	C	D	A	C

**Explanations:**

**1.**  $\therefore 45^\circ \equiv 9000$  (Expenses on Football)

$\therefore 100^\circ \equiv x$  (Expenses on Hockey)

On cross multiplication, we get

$$x = \frac{9000 \times 100^\circ}{45^\circ} = 20000$$

$\therefore$  Required difference =  $20000 - 9000 = 11000$ .

Hence, option A is correct.

**2.**  $\therefore 45^\circ \equiv 9000$  (Expenses on Football)

$\therefore 160^\circ \equiv x$  (Expenses on Cricket)

On cross multiplication, we get

$$x = \frac{9000 \times 160^\circ}{45^\circ} = 32000$$

Hence, option C is correct.

**3.**  $\therefore 45^\circ \equiv 9000$  (Expenses on Football)

$\therefore 360^\circ \equiv x$  (Expenses on All sports)

On cross multiplication, we get

$$x = \frac{9000 \times 360^\circ}{45^\circ} = \text{Rs } 72000$$

Hence, option D is correct.

**4.**

$$\text{Reqd. \%} = \frac{\text{Expenses on Tennis (in deg)}}{\text{Expenses on Basketball (in deg)}} \times 100\%$$

$$= \frac{35^\circ}{20^\circ} \times 100 = 35 \times 5 = 175\%$$

Hence, option A is correct.

**5.**  $\therefore 360^\circ \equiv 5040$

$\therefore (100^\circ - 45^\circ) = 55^\circ \equiv x$

On cross multiplication, we get

$$x = \frac{55^\circ}{360^\circ} \times 5040 = 770.$$

Hence, option C is correct.
