# DI table Chart Questions for SBI Clerk Mains, IBPS Clerk Mains, RBI Assistant Mains, LIC AAO, SBI PO Pre, IBPS PO Pre and RRB Scale I Pre Exams.

## DI Table Chart No 102

**Directions:** Study the following table chart carefully and answer the questions given beside.

Three districts A, B and C of Agra receive a certain number of N95 masks from manufacturers in five different cities.

The table given below shows the average number of masks received by each district from each city, ratio of masks received by C and that received by A and B together and also the ratio of masks received by A and B.

|          | Average Masks | $C/(A + B)$ | A : B |
|----------|---------------|-------------|-------|
| Varanasi | 4200          | $1/8$       | 2 : 3 |
| Jaipur   | 5400          | $1/5$       | 7 : 2 |
| Bhilwara | 2400          | $2/7$       | 2 : 5 |
| Surat    | 2650          | $1/4$       | 3 : 7 |
| Ajmer    | 2420          | $2/9$       | 2 : 7 |

1. The masks received by A from Ajmer is what percent of the masks received by B from Bhilwara?

- A. 27.5%      B. 25%      C. 35%      D. 33%      E. 32.5%

2. What is the average number of masks received by B from Surat and Ajmer?

- A. 4482      B. 4223      C. 4536      D. 4584      E. 4566

3. What is the difference between the masks received by A and B together from Varanasi and Bhilwara?

- A. 5600      B. 4200      C. 5240      D. 5800      E. 5400

4. What is the ratio of the total number of masks received by C from Surat and Ajmer to that received by B and C from Jaipur?

- A. 97 : 190      B. 82 : 185      C. 17 : 52      D. 32 : 85      E. None of these

5. What is the difference between the number of masks received by A from Jaipur, Bhilwara, and Surat and the number of masks received by B from Varanasi, Surat, and Ajmer?

A. 1748

B. 786

C. 1640

D. 1790

E. None of these

Correct Answers:

|   |   |   |   |   |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| D | C | A | A | E |

Common Explanation:

Total masks received from Varanasi =  $3 \times 4200 = 12600$

$$\frac{C}{A+B} = \frac{1}{8}$$

Adding 1 on both sides

$$\frac{C}{A+B} + 1 = \frac{1}{8} + 1$$

$$\frac{C+A+B}{A+B} = \frac{9}{8}$$

$$\frac{4200 \times 3}{A+B} = \frac{9}{8}$$

$$\text{Masks delivered to } A+B = \frac{8}{9} \times 4200 \times 3 = 11200$$

$$A+B = 11200$$

$$A:B = 2:3$$

$$\text{Masks received to } A = \frac{2}{5} \times 11200 = 4480$$

$$\text{Masks received by } B = 11200 - 4480 = 6720$$

$$\text{Masks received by } C = 4200 \times 3 - 11200 = 1400$$

Similarly calculating for each state, we get:

| City     | Total | A     | B    | C    |
|----------|-------|-------|------|------|
| Varanasi | 12600 | 4480  | 6720 | 1400 |
| Jaipur   | 16200 | 10500 | 3000 | 2700 |
| Bhilwara | 7200  | 1600  | 4000 | 1600 |
| Surat    | 7950  | 1908  | 4452 | 1590 |
| Ajmer    | 7260  | 1320  | 4620 | 1320 |

**Answers :**

1. From common explanation, we have

$$\text{Reqd. \%} = \frac{1320}{4000} \times 100 = 33\%$$

Hence, option D is correct.

2. From common explanation, we have

$$\text{Reqd. average} = \frac{4452 + 4620}{2} = 4536$$

Hence, option C is correct.

3. From common explanation, we have

$$\text{Required difference} = (4480 + 6720) - (1600 + 4000) = 5600$$

Hence, option A is correct

4. From common explanation, we have

$$\text{Required ratio} = (1320 + 1590) : (3000 + 2700) = 97 : 190$$

Hence option A is correct

5. From common explanation, we have

$$\text{Masks receive by A from Jaipur, Bhilwara and Surat} = 10500 + 1600 + 1908 = 14008$$

$$\text{Masks received by B from Varanasi, Surat and Ajmer} = 6720 + 4452 + 4620 = 15792$$

$$\text{Required difference} = 15792 - 14008 = 1784$$

Hence, option E is correct.
