**1. Hints to Remember**

**Who:** Water's value

**What:** cannot be pegged to its price alone: UN report

**When:** published on 22<sup>nd</sup> March 2021

The real worth of water has often been neglected, leading to its wastage, misuse and misappropriation by certain interests, flagged the United Nations World Water Development report released March 22, 2020, the World Water Day.

**The report noted an urgent need to change the way water is valued and grouped current methodologies and approaches to the valuation of water into five inter-related perspectives:**

1. Valuing in situ water resources and ecosystems
2. Valuing water infrastructure for water storage, use, reuse or supply augmentation
3. Valuing water services, mainly drinking water, sanitation and related human health aspects
4. Valuing water as an input to production and socio-economic activity, such as food and agriculture, energy and industry, and business and employment
5. Other socio-cultural values of water, including recreational, cultural and spiritual attributes

It said the primary reason for limited successes in attaining water-related goals and targets was the absence of a full representation of the values of water. The tools and methodologies we have today for valuing water reduce it to only its economic value, it added. ([Read more](#))

**2. Hints to Remember**

**Who:** Manipur

**What:** emerged as Champion State for Van Dhan Vikas Yojana

**When:** published on 18<sup>th</sup> March 2021

Manipur has emerged as the champion state where the Van Dhan programme has emerged as a major source of employment for the local tribals.

Since the time that the programme was launched in the state in October 2019, 100 Van Dhan Vikas Kendras have been established. These constitute 1500 SHGs and are benefitting 30,000 tribal entrepreneurs, who are involved in the collection, processing, value-adding, packaging and marketing of value-added products from minor forest produce.

With an active cooperation and participation of the state government at every level, the Van DhanKendras of Manipur have turned out to be a model enterprise for the rest of the country. Since its inception as the nodal agency working in the area of tribal upliftment, TRIFED has been implementing several programmes and initiatives. The focus of these initiatives is to make India self-reliant under the Atmanirbhar Abhiyan. ([Read more](#))

### 3. Hints to Remember

**Who:** IISc and Applied Materials India

**What:** Ink R&D Pact for Industry Affiliate Program

**When:** published on 23<sup>rd</sup> March 2021

IISc Bengaluru and Applied Materials India Private Limited, have signed an R&D pact for the Industry Affiliate Program (IAP) of the Centre for Nanoscience and Engineering (CeNSE), of the Indian Institute of Science. As part of the IAP, Applied Materials India is working closely with CeNSE to explore new applications and solutions in the field of advanced materials, said a statement from the company.

“We welcome Applied Materials India on board as an Industry affiliate. It is a win-win relationship given the emphasis of both parties on electronics manufacturing and futuristic technologies”, added Prof. Srinivasan Raghavan, Chairperson, CeNSE, IISc.

Applied Materials India has forged an alliance with IISc for scientific research, which offers infrastructure to take solutions from ‘Lab to Fab’ and provide impetus to semiconductor technology and manufacturing in the country. The main goal of CeNSE is to carry out cutting-edge research and technological innovations and translate them with appropriate partners into successful commercial products and services. ### 4. Hints to Remember

**Who:** India

**What:** to conduct aerial radar surveys of Himalayan glaciers to estimate thickness

**When:** published on 22<sup>nd</sup> March 2021

India is planning to conduct airborne radar surveys of Himalayan glaciers to estimate their thickness.

A pilot study will be conducted in the Lahaul-Spiti basin of Himachal Pradesh. Following this, similar studies will be conducted in Indus, Ganga and Brahmaputra sub-basins as well.

The development is significant given the importance of glaciers in India's river systems.

**Significance:**

The glaciers help sustain around 500 million people living downstream in the Indo-Gangetic plains.

The glaciers are also important from an energy security standpoint and have a strategic imperative.

## 5. Hints to Remember

**Who:** Net-Zero emissions in India's energy systems

**What:** achievable by 2050: TERI & Shell report

**When:** published on 23<sup>rd</sup> March 2021

Energy is at the heart of development and India has high aspirations as it strives to create a better life for its population of almost 1.4 billion people. But how can India accomplish this and make progress towards reaching a net-zero emissions economy by 2050 in support of broader well-being? To reach a net-zero emissions energy system by 2050, India needs a suitable policy and innovation driven context to deploy clean energy technologies on a massive scale. It requires more and faster deployment of large-scale solar, wind and hydro power to enable greater electrification across the country. It also requires the development of new fuels, such as liquid biofuels and biogas, as well as hydrogen produced from electrolysis. Energy efficiency must improve significantly, and carbon removals (from technology and nature-based solutions) will have a critical role in moving towards zero emissions. These are the key insights from a new scenario sketch by TERI and Shell, that has assessed India's technology and policy options if it were to accelerate its transition to a net zero emissions energy system by 2050.
