# Puzzle Test Questions for SBI Clerk Pre, IBPS Clerk Pre, RBI Assistant Pre, LIC Assistant Pre and IBPS RRB Exams.

## Set No 156

**Directions:** Study the following information carefully and answer the questions given beside:

Eight candidates from A to G appeared for an exam on 5<sup>th</sup> and 12<sup>th</sup> of different months viz. April, May, June and July such that on one day only one candidate appeared for exam. D had appeared before two candidates but not before B and E. Only C had appeared between A and B, who had his exam on 5<sup>th</sup> of an even numbered month. F and B appeared in consecutive months but not on consecutive turns. G was among the last two candidates that appeared for exam. F has his exam before G. Only one candidate appeared between H and E.

1. Whose exam was on 5<sup>th</sup> July?

- A. B                      B. F                      C. H                      D. G                      E. Either G or H

2. Who among the following has exam(s) on even numbered dates of odd numbered months?

- A. C and G              B. B and D              C. F and E              D. F and G              E. H and G

3. After arranging all the persons in alphabetical order, position of how many persons will remain unchanged?

- A. None                      B. One                      C. Two                      D. Three                      E. None of these

4. B's exam is on which date?

- A. 5<sup>th</sup> April                      B. 12<sup>th</sup> May                      C. 5<sup>th</sup> May                      D. 12<sup>th</sup> April                      E. None of these

5. Whose exam is in the last?

- A. F                      B. H                      C. E                      D. G                      E. None of these

**Correct Answers:**

1	2	3	4	5
C	D	B	A	D

## COMMON EXPLANATION:

### Reference:

D had appeared before two candidates but not before B and E.  
Only C had appeared between A and B, who had his exam on 5th of an even numbered month.

### Inference:

Case 1: When B has his exam on 5th April

Month	Date	Candidates
April	5	B
	12	C
May	5	A
	12	
June	5	
	12	D
July	5	<del>B</del>
	12	E

Case 2: When B has his exam on 5th June

Month	Date	Candidates
April	5	
	12	
May	5	A
	12	C
June	5	B
	12	D
July	5	<del>B</del>
	12	E

### Reference:

F and B appeared in consecutive months but not on consecutive turns.  
F has his exam before G.  
G was among the last two candidates that appeared for exam.

### Inference:

Case 1: When B has his exam on 5th April

The only left date for E is 5th June because E can't have exam after D as per previous hints.

Month	Date	Candidates
April	5	B
	12	C
May	5	A
	12	F
June	5	E
	12	D
July	5	G/
	12	G/

Case 2: When B has his exam on 5th June

Month	Date	Candidates
April	5	
	12	
May	5	A
	12	C
June	5	B
	12	D
July	5	F
	12	G

**Reference:**

Only two candidates appeared between H and E.

**Inference:**

Case 2 fails, as E and H are at consecutive positions here.

Case 1: When B has his exam on 5th April

Therefore H appeared on 5th July and G on 12th July.

Month	Date	Candidates
April	5	B
	12	C
May	5	A
	12	F
June	5	E
	12	D
July	5	H
	12	G

## Answers :

1. Following the common explanation, we get

H has his exam on 5<sup>th</sup> July.

Hence option C is correct.

2. Following the common explanation, we get

F and G had their exams on 12<sup>th</sup>(even) of odd numbered months i.e. May and July.

Hence option D is correct.

3. Following the common explanation, we get

After arranging all the persons in alphabetical order, position of one person i.e. E will remain unchanged.

Hence option B is correct.

4. Following the common explanation, we get

B has exam on 5<sup>th</sup> April.

Hence option A is correct.

5. Following the common explanation, we get

G's exam is in the last.

Hence option D is correct.
