Seating Arrangement Questions for IBPS RRB Scale - I (Mains) Exams.

SA Set No 180

Directions: Read the following information carefully and answer the questions given beside.

Eight persons from A to H sit in two parallel rows such that 4 persons sit in each row. The persons in one row face towards south while persons in another row face towards north, in this way persons in both the rows are facing each other. C sits second to the left of E, who sits at one of the extreme ends. D faces the one who sits on the immediate left of H. A is third to the right of F, who faces north. B and D sit in different rows. H is not adjacent to C.

Now they change their position while shifting to another row where 8 chairs are placed in a linear row facing towards the south and no chair remains vacant. Left end and right end of the row considered while facing the South direction. Read the following instructions to know about their movement.

For Example:

X2 means that the person sitting immediate left of X will be shifted to the third chair from left end of the row.

X6 means that the person facing X will sit on the immediate right of X.

X7 means that the person sitting immediate right of X will sit on the immediate left of X.

X9 means that the persons sitting adjacent to the one facing X will sit at the ends.

On the basis of above Example, interpret the following equation and prepare a new arrangement.

It is known that E is third to the left of D in the new arrangement.

C2, B9, H7, D6

1. The number of persons sitting between A and F in the new arrangement is how much more/less than that of in the old arrangement?
- A. 2 more B. 3 more C. 1 more D. 2 less E. Can't be determined
2. What is the position of G with respect to H in the new arrangement?
- A. Fifth to the left B. Fourth to the left C. Second to the left D. Third to the right E. None of these
3. What is the position of the person in the new arrangement who faces A in the old arrangement?
- A. Sixth from left end B. Fifth from right end C. Third from right end
- D. Third from left end E. None of these
4. As per new arrangement, H is related to D in a way, C is related to B in the same way then who is related to E in the same pattern?
- A. D B. B C. A D. G E. None of the above
5. Which of the following pairs consists of the persons that are immediate neighbors in old as well as new arrangement?
- A. H - C B. F - B C. H - A D. E - G E. None of these

Common Explanation:

Reference:

C sits second to the left of E, who sits at one of the extreme ends.

D faces the one who sits on the immediate left of H.

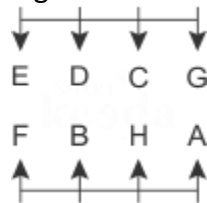

A is third to the right of F, who faces north.

B and D sit in different rows.

H is not adjacent to C.

Inference:

Following arrangement can be prepared with the given hints.

Reference:

X2 means that the person sitting immediate left of X will be shifted to the third chair from left end of the row.

X6 means that the person facing X will sit on the immediate right of X.

X7 means that the person sitting immediate right of X will sit on the immediate left of X.

X9 means that the persons sitting adjacent to the one facing X will sit at the corners.

It is known that E is third to the left of D in the new arrangement.

C2, B9, H7, D6

Now they change their position while shifting to another row where 8 chairs are placed in a linear row facing towards the south and no chair remains vacant.

Inference:

With the help of previous arrangement and second, third and fifth hints we can say that B is on the immediate right of D and E is third to the left of D.

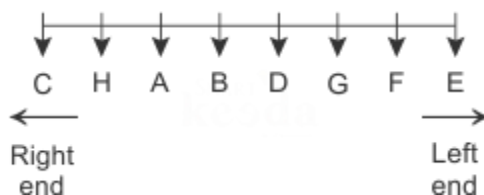

With the help of previous arrangement and fourth hint, it is clear that E and C sit at extreme ends.

After compilation of above two inferences, we can conclude that E is at extreme left end of the row.

With the help of previous arrangement and first hint, G will be adjacent to D.

With the help of previous arrangement and third hint, A is on the immediate left of H.

We don't have any hint about F, but as per last hint no chair remains vacant, thus F will occupy the only left chair.

1. The number of persons between A and F in the old arrangement is 2 and that of in new arrangement is 3.

Therefore 1 more is correct.

Hence option C is correct.

2. G is fourth to the left of H in the new arrangement.

Hence option B is correct.

3. G faces A in the old arrangement and G is third from left end in the new arrangement.

Hence option D is correct.

4. H is related to D as third to the right of D, similarly, C is third to the right of B, in the same way D is related to E as third to the right of E.

Hence option A is correct.

5. H - A are the immediate neighbors in the old as well as new arrangement.

Hence option C is correct.
