## Answers :

1. Trojan horse, logic bomb and Malware are names of viruses that attacks the system of software whereas Firewall is software used for protection of PC from viruses. Cryptographic protocols are used to secure information from such attacks. TLS (Transport Layer Security) protocol is used to secure HTTP connection

Therefore the answer is (E) None.

2. An email bomb is a form of net abuse where huge volumes of email to an address are send in an attempt to overflow the mailbox or the hosted email address in a denial-of-service attack. Email spamming is a form of bombing, it refers to sending email to hundreds or thousands of users (or to lists that expand to that many users) instead to a particular email Id or host.

Therefor the Answer is (C) E-mail Bomb

3. Software piracy can be explained as the illegal copying, distribution and use of software. Soft loading (also called soft lifting), is a way to share a program with someone who is not authorized by the license agreement to use it. Hardware loading is a form of piracy that involves loading an unauthorized copy of software onto a computer being sold to the end user. This attracts more users as it's free and finally the fastest-growing form of piracy is Internet piracy through downloading. If seen in whole the best example is a person comes across a software online either hacks and downloads it or buys it for one time and then uploads the copy on various sites and systems.

Therefore the Answer is (D) All of the above

4. Ctrl + Shift + Delete is a shortcut used for deleting the browsing history. this shortcut is compatible across all web browsers and when All three are clicked a pop up first appears with options asking the time period of the history to be deleted.

Therefore the Answer is (E) Ctrl + Shift + Delete

5. The programs that display advertisements on our computers or redirects to advertising websites and it collects or picks data about you, like the types of websites that you visit and then gives customized adverts. Adware usually asks for access permission but is Adware does not ask your permission and gathers information, it is regarded as malicious a Spy behavior hence also being regarded as spyware.

Therefore the Answer is (A) Adware

- 6.** Virus stands for Vital Information Resources Under Seize, is a type of malicious software program or a piece of code that gets loaded in our computers without your knowledge and runs against your consent. They insert themselves into host programs and spread on the execution of infected programs. Infected computer programs can include, as well, data files, or the "boot" sector of the hard drive.

Therefore, the Answer is (B) Vital Information Resources Under Seize

- 7.** A proxy server is a computer that acts as an intermediate between the computer and the Internet for processing of internet requests. It allows client computers to make indirect network connections to other network services. By connecting through one of these servers, your computer sends your requests to the proxy server which then processes your request and returns what you were wanting.

Therefore, the Answer is (B) to process client request for Web pages.

- 8.** The 'Deep Web' refers to all web pages that search engines cannot find, such as user databases, registration-required web forums, webmail pages, and pages behind paywalls.

Deep Web is referred to the data which are not indexed by any standard search engine such as Google or Yahoo.

Therefore the Answer is (A) Deep Web

- 9.** Netiquette is actually etiquette on the Internet. Since the Internet changes rapidly, its way of working does too and hence it requires some rules and manner that controls it's working. The need for a sense of netiquette arises mostly when sending or distributing e-mail, posting on Usenet groups, or chatting.

Therefore the answer is (C) Netiquette.

- 10.** As per the Copyright law sharing, copying and posting copyrighted data is considered as an offense as you are using someone's original work without permission or given rights. Copyrights are created to maintain authorship on Original works.

Therefore the answer is (C) Sharing copyrighted files without permission breaks copyright laws.
