Common Explanation:

Change in Words: Words are rearranged as per dictionary order and shifted to extreme left end. The word that comes first as per dictionary order is taken first and shifted to extreme left end then second word as per dictionary order is placed at extreme left end in the next step and so on until all the words are rearranged as per the logic.

Change in Numbers: Numbers are changed by multiplying them with 2. The procedure takes place as per ascending order of the original numbers. After doubling the number it is placed at left end just next to the rearranged word.

Note- Only one word and one number is selected for rearrangement in one step.

Answers :

1. Following common explanation, we get that

The sum of the even numbers of step II is $14 + 12 + 24 = 50$.

Hence option B is correct.

2. Following common explanation, we get that

The 3rd term from the left end in step II is: Disturbing

Hence option C is correct.

3. Following common explanation we get that

12 is third from the right end in step III.

Hence option C is correct.

4. Following common explanation we get that

49 is the odd one out because rest numbers are among the ones present in step IV.

Hence option E is correct.

5. Following the common explanation, we get that

"Master 26 Growling 14 Disturbing 12 24 Wacky" is the step III.

Hence option A is correct.
